Case Management

DM2000®

DM2000®, the Docket Manager, is a case and calendaring program that enables a firm to connect its cases to the courts by matching case numbers with the Northern Illinois court calls and “Black Line” assignments. This unique matching feature along with a full-featured case management program provides the best possible litigation diary available. DM2000® integrates the court’s diary with the firm’s diary to create a total solution to calendaring. This improves the firm’s workflow and its ability to manage its caseload effectively.

Customer inspired daily, weekly, and monthly reports supply crucial information necessary to meet court deadlines, appearances, depositions, and more. “Black Line” Court Call reports indicate cases above the “Black Line” that are ready for trial assignment and cases below the “Black Line” waiting for completion of discovery, and advancement to trial.

DMO Outlook

DMO Outlook interfaces DM2000® with Microsoft Exchange, automatically populating your attorneys’ Microsoft Outlook calendars with DM2000® appointments. Attorneys may synchronize with their Blackberry, iPhone or other handheld device.

- Quicker: Attorneys receive docket information quicker than before...so they’ll be able to view future dates as soon as they are calendared in the firm’s central Docket Department.
- More convenient: Attorneys enjoy the convenience of having their personal court call information at their fingertips wherever they go.
- Easier: Attorneys may respond easily from Outlook back to docket staff after a case event.
